Experiencing Lockdown

PAGE NO. :

DATE :

of people are infected by COVID. By now, about 3 million people already died, in Nepal only nearly 25000 people are infected by it and over 100 people are died. To date everything is uncertain. The psychological fears prominent. No body knows when and how this deadly virus will be subsided. When an effective vaccine will be available and how the 'new normal' life will be. If there is a god, I believe he/she must have a good plan for their childrens in the universe. Stay safe, Stay Healthy!

Thankyou
