My experience ~~dur~~ during lockdown

It was the time to say bye to class 4 when lockdown started. It has been a painful time as well as interesting time. No one expected the corona virus will haunt us for this long period of time. No one was ready for this fight. Corona virus was recognized at 2019 December 31.

Almost a year is going to pass with fear of corona virus. Listening about deaths and cases added due to corona virus were shocking at the beginning. No one expected that corona virus cases and deaths will cross millions. Even though most of the corona virus patient are recovered but the fear of corona virus isn't less. This virus deaths and cases are ~~inre~~ increasing day by day.

Every day listening about corona went boring for me at middle of lockdown but following safety measures in this time is our duty so I followed all safety measures. Even though we all know all the safety measures for corona virus preventions, I found that many people in

our country are neglecting it. We should not neglect corona virus. If we travel without any precautions we can easily get infected and due to our carelessness we may harm others too. As winter is coming we should be more conscious on this topic.

Poor online classes due to internet problem has been a major issue now in lockdown but my online classes are smoothly running. I ~~felt~~ felt really lucky because I found my school and my respected teachers are working really really hard to promote us. Even though online classes are smoothly running exposure to gadgets a lot of time are effecting my eyes badly. I never expected to use gadget for online classes. I also found that enviroment has also been clear than before as many factories which use to release harmful chemical gases are closed now.

I pray for all those people who are infected by coronavirus to get recovered soon and get healthy. I would love if corona virus would go away faster because I want to go to my school, meet friends, teachers and my relatives too. We ~~is~~ have alot of problems in life but the best way is to face it and fight it. We should learn to face all

the problems we have. I really want to go to  
my daily life faster. Stay healthy, Stay immune!
