## COVID-19: MY EXPERIENCE

When the first case of coronavirus was found in Nepal, government declared lockdown in the country. Lockdown made a huge impact in everyone's life. At first, when the lockdown was just started we students were having our session break so we spent our time in our houses. During this lockdown, many people were trying to be productive. There are certain precautions that I took like sanitizing, wearing mask, social distancing, etc. during this period. When time passed, school announced that we should buy books and school supplies for the next semester. In between, when lockdown was ended people went to offices but the schools remained closed. Similarly, most governments around the world decided to close schools until a cure is discovered. Then the cases started to increase day by day and it was not safe. So, again lockdown was declared by the government.

The main impact that covid-19 made in our student's life was that we were not permitted to go to schools. But instead of that we were

supposed to study online. That was the first time, we were experiencing something new like this. It was a whole new way of studying for us. Our school suggested of an app called "Zoom" to teach us and "Google classroom" to communicate and give us assignments. In today's generation, it was a bit easy to download and learn the functions of the apps. Studying virtually was a little difficult at first but, as we were having classes it became easier. Studying through devices and staying in front of computer for a long time is pretty tiring. My school gave 2 days off-screen break each month so that the students could get rest. Not only the virus had affected student's life but teachers and parent's lives were also affected due to the closure of schools.

Learning online is kind of stressful as I was not used to being around technology for a long period of time. Covid-19 had affected us to learn technology and know about it more closely. I am starting to learn about technology, internet, computer, etc. as we being a student were supposed to do our homework and

submit it through technology. I got to know and learn many things because of technology, which is beneficial in today's generation. To conclude, Covid-19 made a huge impact on student's life. Students accepted a lot of new difficulties because of it and I got experience new and strenuous conception. My experience during Covid-19 was intense, amazing and horrible at the same time. Covid-19 has pretentious everyone worldwide.
