My Experience During Lockdown Period of COVID-19

So my school is also closed during this lockdown period and now I have started studying through online classes which is conducted by my school. For this I will always be grateful to my government and the teachers of my school. Studying at home with the internet was my first experience and this experience proved to be very good for me. Because my online classes were convenient for me. They allow me to take additional classes. Internet classes allow me to be at home with my family. There are many benefits of taking online classes for a student, such as: Saving money, Saving time and getting the most facilities at home. I studied all subjects in online classes. In online classes with our friends, we discussed about our upcoming paper and shared our thoughts. I have never found it difficult to communicate with

my instructor seeking help or clarification to make a school assignment while at home, I prepared all the school projects and assignments. I studied diligently during the lockdown. Internet classes save time, and saving time is very important to me. I don't feel like I'm missing anything by taking online classes. Actually, I have gained a lot of knowledge from online classes. I have learned that to become a successful distance learner. Internet classes have also taught me to be disciplined in life and to use internet by computer, phone, laptop etc. While studying in online classes there may occur some electricity problems but teachers are helping to solve that kind of problems. By this online classes I have learned to coordinate with teacher. Actually, online classes are helpful to us. Online courses are not only convenient

but they teach you how to become a more disciplined scholar.

During this lockdown period I have spend lot of time with my family. My grandmother is teaching me the basic of yoga and by her guidance. I am planting few plant in my garden. I am also learning cooking through internet. I am also spending my time by watching movie with my family. In this period of lockdown I have realise many things which I wasn't able to do during my academic year i.e To take care, to love in distance, to keep our society clean and my room, to be responsible, to save our environment, to understand our family members, to stay inside, to connect in virtual, about the value of money and life, to live this life with what we have.

We all must follow the lockdown rules

and also maintain a good hygiene.

Together, we all can bring and end to this pandemic.

All our wishes will really work,
Stay Home and Stay Safe.
