Roll No - 28

The topics of my lesson in Environment

Environment is a natural world where plants and animals live. ~~where~~ where human live also live here. The environment is the place where plants and animals can survive. Environment is most important for plants, and animals etc. In environment people should clean daily the environment because it is the place for living beings. Environment should clean everyday in daily life. We should not throw plastic, paper, waste materials in the environment. Human need good environment for survive. We should make taps, roads, dams for good environment for live. plants also need good environment for survive. We should clean our surrounding to the free from such kinds of diseases. We can avoid diseases by cleaning environment or surrounding daily. We should drinking water taps, and also clean dass, road and we should clean rivers and lake that's way we can be free from any kinds diseases. We ~~sh~~ can clean environment for healthy life. For healthy life or healthy environment we ~~\$~~ have to clean our environment. For healthy environment we should put dustbin everywhere.

We should throw dust, paper, wastmaterials in the dustbin. If we do not obey we will be sick from many kinds of diseases. for healthy we should not sewage in the water of river and taps etc. Ynix
